

Customer Churn Analysis – Business Report

Executive Summary

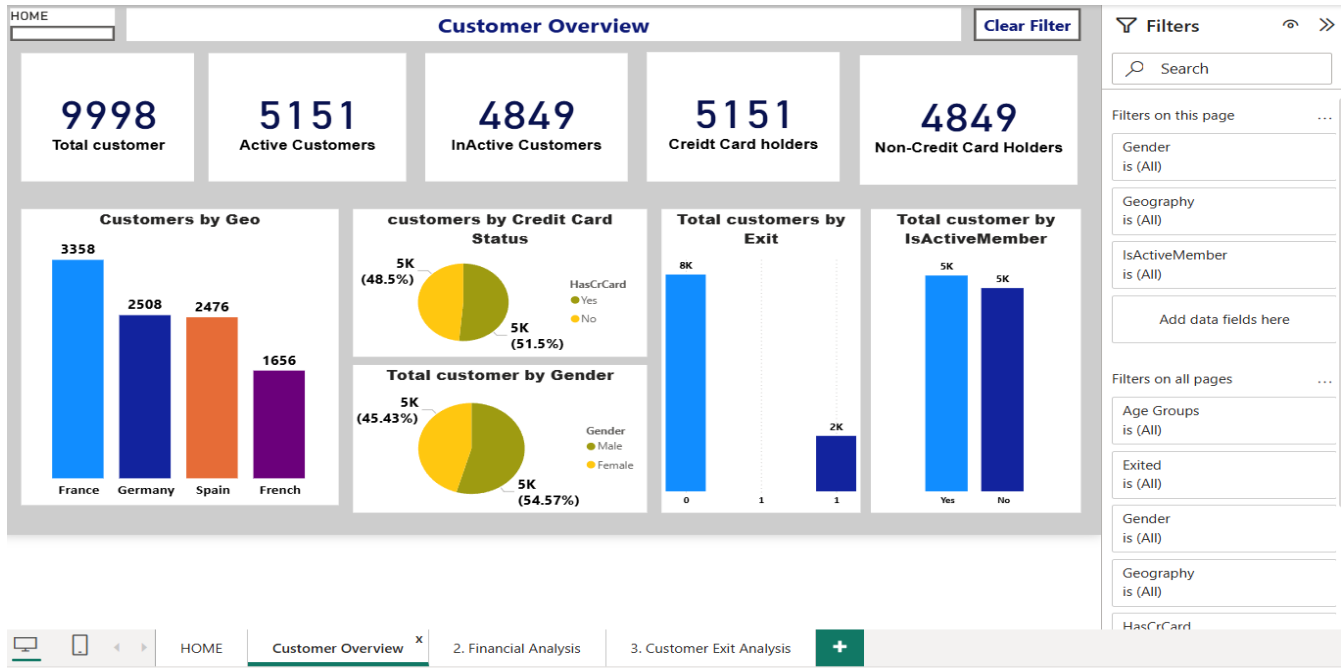

The analysis is based on 9,998 customers. The overall churn (exit) rate is 20.4%, while retention stands at 79.6%. Nearly 48.5% of customers are inactive, indicating a large at-risk segment. The average balance is 76K and average salary is 100K.

Dashboard Overview

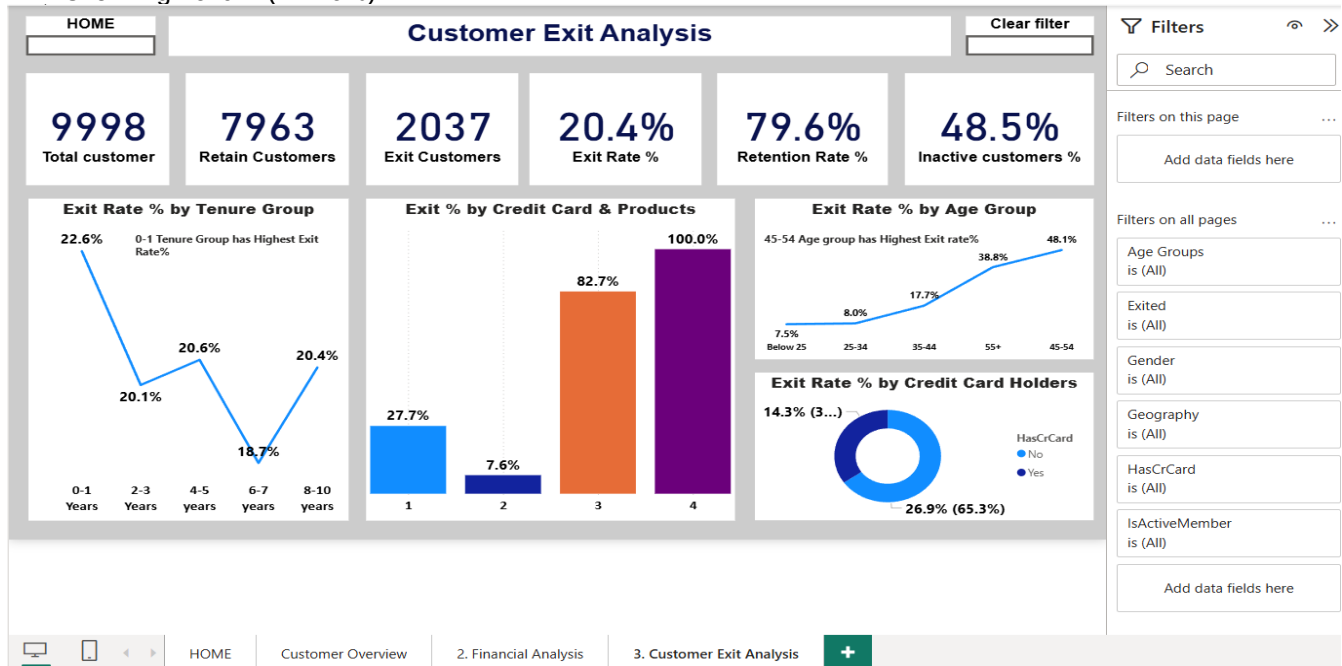

Customer Overview Insights

Out of 9,998 customers, 5,151 are active while 4,849 are inactive. Credit card ownership is nearly evenly split. France has the highest number of customers (3,358), followed by Germany and Spain.

A total of 2,037 customers have exited. The highest churn is seen in the 45–54 age group (~48.1%). Customers with 4 products show the highest exit rate (100%). New customers (0–1 years tenure) also show high churn (~22.6%).

Business Recommendations

1. Improve engagement strategies for inactive customers (48.5%). 2. Focus on high-risk age group (45–54). 3. Enhance onboarding for new customers (0–1 years). 4. Promote balanced product usage to reduce churn risk.
